

FIX MOTOR CONTROL

MOTOR DIGI 1 // MOTOR DIGI 6 // MOTOR DIGI 12 // MOTOR DIGI 24

Motor remote control for 1 // 6 // 12 // 24 motors

Motor Digi 1 // 6 // 12 // 24 are lightweight controllers. Up to 24 motors can be controlled only with a few pushbuttons.

Pushbutton for selecting motor, up, stop and down.

Pushbutton for making system RUN.

Emergency pushbutton for total stop.

On/off key for avoiding undesired manipulations.

They have a support to be fixed on a wall.

They are used for controlling motors which work with MOTOR DIGI BOX or MOTOR DIGI RACK 6-1CV or 6-2CV.

Strong Stage recommends using these products to control Prolyft motors.
