# FIX MOTOR CONTROL

WiFi MOTOR DIGI BOX

Interface for motor control

Interface between motor controllers of Digi Box series and software of control via PDA, Motor Digi Box Remote Control.

It establishes communication with the PDA via wireless and translates that information into Digi Box communication protocol.

It has a security check which activates the emergency stop button if communication with the PDA is lost.

Reference:　　　*03000117*

Dimensions	440x300x110 mm
Exterior finish	Black colour
Power supply	Single-phase 230V 50Hz

SOFTWARE PDA

Software of the PDA that controls the Digi Box system

When WiFi MOTOR DIGI BOX is incorporated into a Digi Box System, it is necessary to install a software for converting the control signal received in the PDA.

This software can be installed in any common PDA.
