

## LIGHTING REGULATION - WALL DIMMERS

### PANIC MODULE 4 RCD KIT FOR POWER 24 PATCH KIT 48 WEILAND SOCKETS 2 RCD KIT FOR POWER 12 PATCH KIT 24 WEILAND SOCKETS

#### *Panic module:*

Optional module for Power 6-3 EM dimmers. It is for activating, by means of a free tension circuit, a pre-configured lighting state in case of emergencies.

Free tension circuit can be activated by an emergency stop button or a switch. Emergency lighting state can be programmed through the dimmer.

It is manufactured with an input jack connector and an output one for connecting more than one dimmer in series.

#### *RCD KIT:*

Extension kit, which can be adapted to Power 24-3 dimmers (4 RCD KIT FOR POWER 24) and Power 12-3 dimmers (2 RCD KIT FOR POWER 12), composed of 4 residual-current devices (RCD) or 2 RCD, respectively, each one of which is a circuit breaker of 4-pole, 40-Amp and 30mA (before tripping). They are mounted in a 3-unit rack-19" frontal. Each residual-current device (RCD) protects 6 channels.

#### *Patch Kit Weiland sockets:*

Extension kit which consists of a patch of weiland sockets for all the outputs of a Power 24-3 dimmer (PATCH KIT 48 WEILAND SOCKETS) or a Power 12-3 dimmer (PATCH KIT 24 WEILAND SOCKETS). It is manufactured with 2 frontals of 2 rack-19" units.
